

Website User Story

We propose to create our website « 3etr ».

« 3etr » makes it easy to start a business and **sell perfume** online. We will create a user-story with this context. Our customer who is an user of our e-commerce website , want buy a perfume. For that, he needs to add a product in the cart.

By using « 3etr », clients only need to type the brand name or the perfume they are looking for and they'll automatically be shown:

- **Products:** with images of all the perfumes from that brand.
- **Categories:** which they can even filter by gender.
- **Offers:** if they are activated for that product or category.

Our principal actors are : **Administrator**, **Customer** and **Visitor**.

As a Customer, I want to login to the site so that I have access to all my favourites products

As a customer , I want to contact admin , so that I can comment when I want

As a customer, I want to access in my cart , so that i can add a new product or pass a comand

As a Customer , I want to pay my commands, so that I can use my payment Card

As a woman , i want to navigate in To her space , so that i can find a feminin perfumes easily

As a man, I want to navigate in to him space , so that i can find a masculin products easily

As an admin, I want to delete products or add new product by category so that offer many choice for female or masculine Customers.

As an admin, I want to add various products with good brands and prices, so that I get more customers

As An admin , i want to consult all commands , delete from or confirm

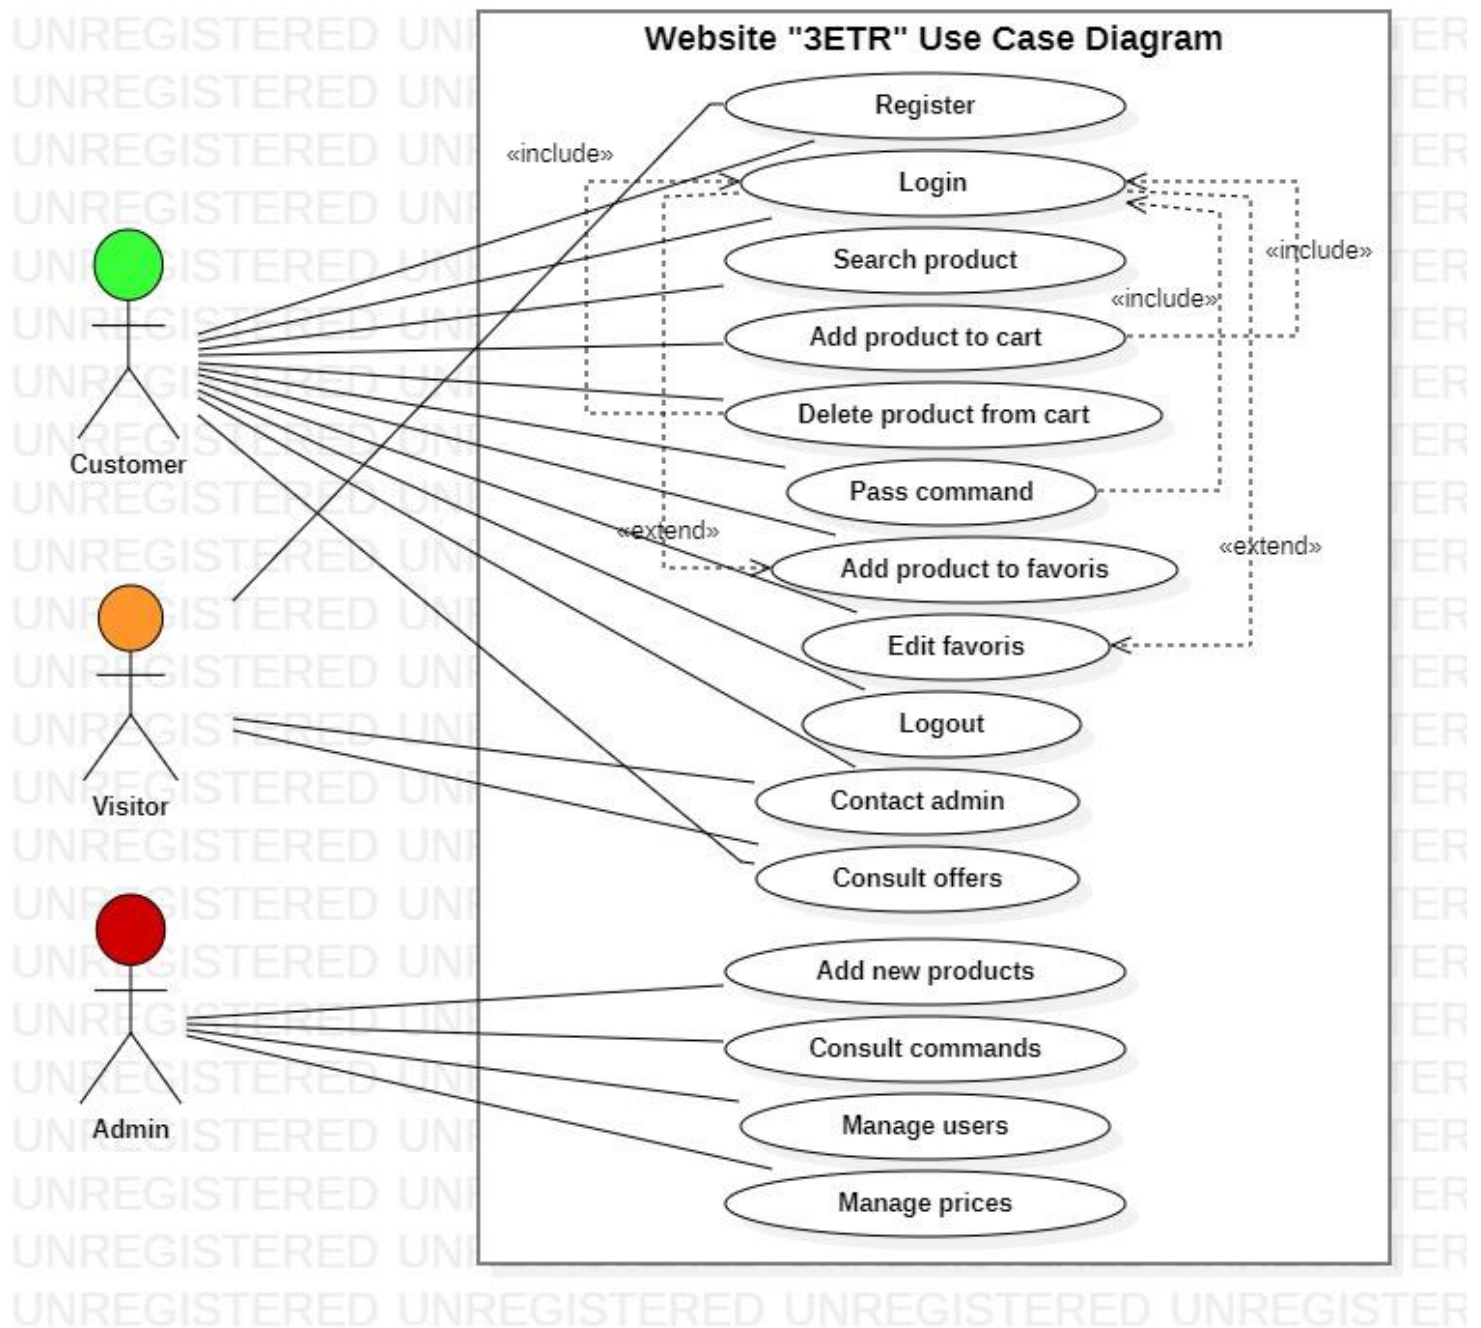

As an administrator, I can delete user , so I can manage users.

As a visitor , i want to register, so that i can have my own cart.

As a visitor, I want to consult offers, so that i can filter perfumes by price or brand.

As a visitor, I want to contact admin , so that i can ask about any product
